Creating visuals and charts using Python libraries

Objectives:

1. Creating, exploring and modifying of BRICS data using Pandas library
2. Creating customized visualizations using Matplotlib library
3. Performing data manipulation such as cleaning data, adding columns, sorting data etc using Python programming

Collab link
:https://colab.research.google.com/drive/1hJ3h1c4yDgP2ojuDgfJ4lGEhWs-byNri?usp=sharing

Note :
I have uploaded the files to collab, but when u refresh , the files won't be accessible so u have to upload them each time u refresh or start the notebook , before working on them
